Experience

Strider Technologies

May 2023 – Present

Sr. Director of Product Design

Jan 2026 – Present

- Implemented AI tools and processes across product design; introduced Subframe and Claude Code for faster user research and production React code handoffs.

Director of Product Design

Jan 2025 – Jan 2026

- Owned product design strategy across the platform alongside the VPs of Engineering, Marketing, and Growth; **user task completion +28%** against the annual OKR.
- Led design and product management for the new platform, designing the AI chat experience that connected all four products together; **onboarding completion +35%**.
- Hired and mentored each new senior product designer; built the hiring rubric, leveling guide, weekly critique, and structured design reviews.

Lead Product Designer

May 2023 – Jan 2025

- Built the UX practice as the company's **first designer**, replacing an external agency and embedding continuous research across product teams.
- Architected the Figma design system as the source of truth across product, engineering, and marketing; design to engineering handoff cut from **3+ weeks to 3–5 days**.
- Made research a standing practice for product and engineering: discovery interviewing, concept testing, and usability testing.

ArbiterSports

Nov 2020 – May 2023

Head of UX & Product Design

- Led design and product management for the iOS and Android app for officials, coaches, and athletic directors; **100K+ downloads, 4.7 stars** on Google Play.
- Built the UX research practice from zero: **50+ user interviews**, recurring usability tests, and survey programs whose insights drove a **22% reduction in support tickets**.
- Implemented a Figma design system with component governance and a contribution model adopted across product engineering; **30% faster design to dev cycle**.

Verb Technology

Apr 2015 – Nov 2020

Product Designer & Product Manager

- Led design for the live interactive video platform on desktop, web, and mobile from concept to GA; coordinated a team of 5 across design, engineering, and PM.
- Owned UX across research, information architecture, wireframes, prototypes, and motion design; cut **iteration cycles 25%** with a structured design review cadence.
- Carried product design through the company's **acquisition and rebrand** with zero disruption across consumer and partner surfaces.
